LEATHER ROUTINE

Leather is a genuine material which needs care to last a lifetime. With care it will become more beautiful and softer over the years.

Leather can easily become dry and sometimes crack. It is also easy to get stains.

We have developed a simple routine to help you clean and care for your leather piece including shoes, leather bags, chairs, sofas and more.

1.
Use our Restoring Leather Cleanser to clean the leather surface from dirt. Start with mixing a dash of cleanser with water in a jar to generate foam. Use a clean soft cloth or sponge to apply the foam to your leather piece. Wipe dry.

The cleanser contains organic soap derived from coconut and no harmful chemicals.

2.
After cleaning use our Protecting Leather Balm. Use a damp sponge and apply wax in circles. Once covered with balm, wipe off the excess balm and polish with a clean dry soft cloth.

The balm contains only natural ingredients and will preserve your piece making it softer and more resistant to stains and water.

The balm leaves a lovely scent of forest and uplift the moment.

Don't use leather balm on nubuck and suede but don't be afraid to use it on your skin.

The tin can be reused or recycled.

Always try the balm on a small area before applying to the whole piece.

Tip! Repeat the routine as often as needed.

Recommended products to use: Restoring Leather Cleanser & Protecting Leather Balm.
