WOOD ROUTINE

Wood is a living honest material which is sensitive and needs regular care. It ages beautifully but needs love and care along the way.

As you know, it can get dry which in the end cracks and sometimes liquids can make marks.

We have developed a simple routine to help you clean and care for your wood pieces, tables, chairs, sculptures and more, to make things last.

1.
Use our Reviving Table Cleanser on a daily basis. Spray directly on the surface and wipe with a damp cloth. Let dry.

The cleanser contains soap with a high PH value (+7) and no harmful chemicals.

2.
Use our Nourishing Wood Oil on a regular basis. Take the damp sponge or dry cloth and apply oil in circles over the whole piece. Once covered with oil, wipe off the excess oil and polish with a clean dry soft cloth.

The oil contains only natural ingredients and will preserve your piece by a deep penetration of the wood. It will nourish and protect it from water. Leaving a lovely scent of forest in your room. You can even use the oil on your skin.

Wood oil can be used on all kinds of wood that has been treated with oil before.

Do not use on hard-waxed surfaces.

Always try the oil on a small area before applying to the whole piece.

Tip! Use and care on a regular basis to make things last.
Recommended products to use: Reviving Table Cleanser & Nourishing Wood Oil.
