CARE AND CLEANING RECOMMENDATION FOR FLAT-WEAVE OUTDOOR CARPETS

Regular care for your carpet is first and foremost the vacuuming.

Vacuum your carpet regularly. Always vacuum flatweave carpet with the plain setting, never the brush!

When necessary wash your carpet with a gentle detergent and lukewarm water. We recommend pre-testing your cleaning agent on an unobtrusive area of the carpet or a spare piece of carpet. Rinse by hosing it off.

Textile fibers today have developed so that stain treatment is successful in most cases. It is therefore recommended to possibly immediately treat and remove the stain.

Due to the position of the individual fibres dirt may work its way between the yarns. For this reason we recommend removing dirt and stains by scooping up the stain solids immediately using a blunt object or spoon. Subsequently soak up the liquid stain with absorbent material such as kitchen wipe or cellulose.

If residual particles are still embedded in the structure of the carpet, use lukewarm water and a clean cloth. Wipe with the damp cloth, working from the edges of the stain towards the centre to avoid spreading the substance causing the stain. After removing the dirt, wring out the cloth and try to remove as much of the remaining moisture as possible.
