### SPECIFICATIONS

|                                |   |
|--------------------------------|---|
| Structure:                     | Woven loop pile                                     |
| Pile material:                 | 100% Regenerated PA                                 |
| Coloration:                    | Continuous dyed                                     |
| Backing:                       | WT - Woven Textile                                  |
| Dimensions:                    | Approx 400 cm                                       |
| Total thickness:               | Approx 4,5 mm                                       |
| Total weight:                  | ca. 2,025 g/m <sup>2</sup>                          |
| Pile yarn weight:              | 425 g/m <sup>2</sup>                                |
| Performance areas:             | Class 33 – commercial                               |
| Castor chairs suitability:     | Intensive use                                       |
| Fire classification:           | Cfl-s1  |
| Static control:                | Permanent antistatic                                |
| Thermal resistance:            | 0.08 m <sup>2</sup> KW – suitable for floor heating |
| Impact Sound<br>Insulation:    | $\Delta L_w = 15$ dB                                |
| Sound Absorption:              | $\alpha W = 0,15$                                   |
| Colour fastness to light:      | >5  |
| Certificate no:                | 1021-CPR-006-2/16                                   |
| Declaration of<br>Performance: | Product Group 1C – PA-WT                            |
